

Java

```
class Solution {  
    public int splitNum(int num) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number} num  
 * @return {number}  
 */  
var splitNum = function(num) {  
  
};
```

C++

```
class Solution {  
public:  
    int splitNum(int num) {  
  
    }  
};
```
